Dayton Hamvention 94 Information
April 29, 30, and May 1, 1994
Hara Arena
Dayton, Ohio

[DISCLAIMER: I'm not in any way associated with the Dayton Amateur
Radio Association or the Hamvention. I'm just a local ham who
received a helpful flyer in the mail. -- KD2MT]

[NOTE: Last year's Hamvention program incorrectly listed the dates for the 1994 Hamvention. The above dates are correct. -- KD2MT]

Information:

General: (513) 276-6930
Flea Market: (513) 276-6932 (Reservations not accepted by phone)
Write: Hamvention
Box 964
Dayton, OH 45401-0964

Lodging:

List of hotels available.
Write: Lodging
Dayton Hamvention
Chamber Plaza
5th & Main Streets
Dayton, OH 45402-2400

Also, see the end of this message.

Deadlines:

Flea Market Space: 2/1/94
Award Nominations: 3/1/94
Handicapped Parking Permits: 4/1/94
Advance Registration: 4/8/94 (USA), 4/1/94 (Canada)

Flea Market:

Flea Market space tickets (valid all 3 days) sold in advance only.
3 spaces per person maximum.
Rental tables and chairs not available.
Vendors must also order admission ticket.
Notification of space assignment mailed by 3/15/94.

License Exams:

Novice through Extra exams scheduled for Saturday and Sunday.
To register: Send FCC form 610 (August 85 or later).
Indicate which elements at top of form.
Send copy of current license, if applicable.
Send check for prevailing rates, payable to ARRL/VEC.
Send to: Exam Registration
708 Mapleside Drive

Trotwood, OH 45426

Talk In:

Primary: 146.940 -
Alternate: 146.910 -
223.940 -
442.100 +
Broadcast: 530 AM

Handicapped Parking:

Permits available.
Send S.A.S.E. and copy of State Handicap Parking Permit or
doctor's statement.
Send to: Handicapped Parking
Box 964
Dayton, OH 45401-0964

Unofficial Activities:

Have your group's activities listed in the next mailer
(1/3/94 deadline) or Hamvention Program (3/1/94 deadline).
Write: Unofficial Activities
Suite 108
4500 Wadsworth Road
Dayton, OH 45414-4700

Alternate Activities:

Schedules and reservation forms available.
Write: Karen Lee, N8HRW
9610 Wolf Creek Pike
Trotwood, OH 45426-4148

Advance Registration:

Checks in \$US, payable to Dayton Hamvention.
Send name, address, call, and day and evening phone numbers.
Enclose separate checks for admission and Flea Market.

Be sure to indicate either:

- 1) Send admission tickets ONLY if flea market space assigned
- 2) Send admission tickets REGARDLESS of space assignment

Admission: \$11.00 per person (\$14.00 at door, good all 3 days)
Banquet: \$22.00 per person (\$24.00 at door, if available)
Alternate

Activities

Luncheon: \$8.50 (Saturday), \$8.00 (Sunday), per person

Flea Market: \$30.00 (1 space)

Subject: FAQ request
To: info-hams@ucsd.edu

I must have an old listing of the available newsgroups because when I tried to add the ones listed (named below) I was promptly informed about this group.

rec.ham-radio
rec.ham-radio.packet
rec.ham-radio.swap

Can someone send me the FAQ for this particular newsgroup and tell me the replacements for the PACKET and SWAP groups?

Best Regards,
_ ' Pete Baker

>_that_ building is a 70 foot radio antennae (I don't know the wattage) that
>broadcasts the college radio station out over the town of Fairbanks, Alaska.
>Yes, people really live there!
>What I want to know is: is having that antennae 100 ft away from my dorm
>room window any kind of health risk? Be honest! I wanna know the facts!
>(it broadcasts at 104.1 fm, if that helps at all.)

Well if the station is Class A, 3,000 watts, then the field strength at the antenna is 387.3 V/m and 0.43 V/m at your window for a power density of 0.32 mW/cm². If the station is a Class B maximum power regional station, 100,000 watts, then the field strength at the antenna is 2236 V/m and 2.4 V/m at your window for a power density of 5.38 mW/cm². Note that both cases assume your window is centered in the main lobe of the antenna which isn't true unless your window is level with the top of the antenna. So your exposure is less. Field densities decline with

the inverse square of distance, so tend to fall rapidly in the near vicinity of the antenna.

The OSHA occupational exposure standard is 10 mW/cm², so even the worst case is only half the limit. The new ANSI limit is 1 mW/cm² for long term exposures, so the Class B case puts you above that limit. However, the radio regulations don't allow spaces regularly occupied by the public to exceed 1 mW/cm², so the station certainly is not a Class B. Such stations would normally use a 1000 foot tower that would put the field strength at ground level well inside the most stringent safety standards.

So you shouldn't have any concern that you're being exposed to dangerous levels of RF radiation. Note that at this frequency the concern would be for RF heating of tissue, particularly the eyes. The concerns about magnetic fields at very low levels is in another frequency range altogether, the VLF region centered near power line frequencies of 50-60 Hz. The exposure you are getting to those fields is stronger from the power wiring in the walls of your room than from the radio station.

Safe levels for protection from RF heating effects are well documented, you can feel sure you're quite safe at power densities of 1 mW/cm² or less. The possible risks associated with low level magnetic fields at VLF power line frequencies are much less well documented. Depending on the study, there may, or may not, be a correlation between magnetic field strength at these frequencies and certain diseases. No laboratory work has pointed to a mechanism to claim a cause and effect relationship. So the power wiring in your room *may* be a risk, albeit a tiny one. Research continues.

Subject: Special Event Station (WA3NAN)
To: info-hams@ucsd.edu

Hi,

The Goddard Amateur Radio Club will operate WA3NAN from 17:00-18:00 and
20:00-21:00 UTC December 6-10 to commemorate the 10th anniversary of
Shuttle
Retransmissions. Operation will be on standard GARC Shuttle Retransmission
frequencies, which are

3,860, 7,185, 14,295, 21,395 KHz and locally (MD/DC) on 147.45 MHz (FM).

For a certificate, send QSL or SWL and a 9x12 inch SASE to

Goddard Amateur Radio Club, WA3NAN
P.O. Box 86
Greenbelt, MD 20768-0086

Please note that these times were selected as not to interfere with STS-61
coverage.

Subject: Talk America addendum
To: info-hams@ucsd.edu

Something I forgot to mention about my previous posting regarding the
Talk America stations:

Every Sunday, they carry three technical shows which are of interest to many
people:

Computer Exchange Radio, 12pm - 2pm EST

Modem Mania, 2pm - 3pm EST

Ham Radio and More, 6pm - 7pm EST

Scott Ehrlich typed this about Talk America Radio Network

SE>I would like to compile a listing of broadcast stations across the
SE>country which carry the Talk America Radio Network.

Scott,

I have the listing. You might have to neaten up the layout because of
word wrap etc. I guess this will save you a bunch of work.

Subject : Re: 6 Meter Transceiver Advice ? ? ?

I prefer transverters for all round operation, and prefer multiomde/SSB. A new reasonably priced unit that is new on the market is from: Down East Microwave (see QST for their ad). I believe the transverter runs about \$300 and looks nicely constructed, although not super pretty. Good luck either way P.S. My packet BBS address is AK2F@KA2UGQ if you want to reply that way. 73. >

I looked at a shareware version of Hyperlog several years ago. The
"Feel" (user interface) was quit nice but the program was EXTREMELY
buggy, especially in tracking states/countries worked, etc. Also, it
(obviously) didn't support SAM or other such databases (since they
didn't exist then.

What you are describing sounds MUCH better. Is there a recent
shareware/demo version available (preferably FTP) that I could use
to evaluate? If so, where???

BTW, I bought TOTAL HAM at the Va Beach Convention and I am EXTREMELY
displeased - it is written in Clipper and OH SOOOO SLOW and the DB
format logs are real Disk space HOGS. Also, it cost \$50 (Show Special!)
and quite frankly, I feel burned...
